

1    **Abstract of Disclosure**

2    A stool apparatus is provided for a chair. The chair includes a base, a  
3    post installed on the base and a seat installed on the post. The stool  
4    apparatus includes a stool, a carriage and a telescopic device. The  
5    carriage is used for carrying the stool. The telescopic device is used for  
6    connecting the carriage to the post.
